

Aarav Sharma

Aspiring AI/ML Engineer | Jaipur, Rajasthan | aarav.sharma@example.com | +91 98765 43210 |
github.com/aaravsharma

PROFILE

Motivated BTech student focused on Artificial Intelligence and Machine Learning. Building practical Python projects involving data analysis, prediction models, and simple web applications.

EDUCATION

BTech in Artificial Intelligence and Machine Learning

Example Institute of Technology, Jaipur | Expected graduation: 2028

TECHNICAL SKILLS

Languages: Python, SQL

Data and ML: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

Tools: Git, GitHub, Streamlit, VS Code

PROJECTS

House Price Prediction

Built an end-to-end machine learning application to estimate house prices using property features. Performed data preprocessing and trained Random Forest and Gradient Boosting models. Built a Streamlit interface. Achieved an R-squared score of 0.89.

Titanic Survival Prediction

Developed a classification model to predict passenger survival. Cleaned missing data, performed exploratory analysis, and evaluated the model with approximately 82% accuracy.

Student Performance Prediction

Planned machine learning project to identify at-risk students from attendance, study time, and previous scores. Intended outputs include risk category and study recommendations.

CERTIFICATION

Kaggle - Intro to Machine Learning
